Total Funding Requested for the Life of the Project:**Project Executive Summary:**

Prior to completing the Executive Summary, delete the following text contained within the box:

Limit the Summary to the remaining space on this page, plus one additional full page. The Summary should address the following points.

- 1. Description of the water quality or other natural resource problems the project is addressing, and discussion of the importance of dealing with these problems or issues.*
- 2. Description of the nonpoint pollution sources or factors responsible for causing the identified water quality or other natural resource problems. Load reduction goals for each pollutant should be defined.*
- 3. Description of the actions/activities the project proposes to conduct (including BMPs to be implemented, goals, public information/education efforts, etc.) and how these actions/-activities will meet the project's load reduction goals. Also provide an overview of the proposed schedule for completing project activities, the overall project budget, and the amount of funding being requested from the 319/WPF/WSPF programs.*
- 4. Description of the methods the project will utilize to measure progress during the project's life and to evaluate the project's overall accomplishments.*
